

Trailer and Lorry Security Marking

Postcode marking with self-adhesive vinyl lettering is a quick and effective way to make your vehicle identifiable. Applied to the roof it provides a simple and easy way of tracing trailers and lorries. A postcode is instantly recognizable, easy to remember and can be checked quickly. Some other unique identifiers need to be linked to the company that issued them before tracing the owner can begin.

Roof-mounted lettering can be seen from the air, from bridges and by traffic and other CCTV cameras. They can be covered but if a thief is unaware of the marking the chances of finding a stolen vehicle are much greater. The letters are difficult to remove and will leave a 'ghost' impression behind should the thief try. As well as increasing the likelihood of recovery they will also prove the vehicle belongs to you once found. We recommend too that you stamp, write or engrave your postcode in as many places as possible, inside and out, both concealed and obvious.

The letters are easy to apply, will stick to most clean, smooth surfaces and are available in three colours: black, white and red, to allow the greatest contrast to your background. The standard height is 12 inches (300 mm), which can be adjusted on request. Cost = £28

If you are interested in having your trailer or lorry postcoded. Please contact Horsewatch Scotland below:
